

Background and Credits for 2023 Aiken/Augusta Energy Transition Summit 3 Prospectus:

The *Aiken/Augusta Energy Transition Summit (2023)* Prospectus utilizes information and photos from a variety of sources and we document them below. The intent is to create a vision of Energy Transition in multiple industries and sectors by featuring a wide range of industry images:

Page 1: Photo Matrix.

This matrix was created to reflect the topics, speeches, panels, tours and organizations involved in 2023 and past Summits and Roundtables:

Energy Transition Illustration: Image from an undocumented / uncredited online source ([Creative Pictures | Funny & Amazing Stuff | MAD CLUB: Playing with Susnet \(madsclub.blogspot.com\)](#)). Overlay produced by Linton Consulting. Intended to illustrate that the earth or 'land' is affected by man's energy decisions and beauty is maintained by positive, optimum and environmentally unobtrusive strategies and technologies. Credit: Linton Consulting

Georgia Cyber Center: Credit: Georgia Cyber Center. Image from their website for use in communicating that this will be the meeting kick-off location.

Renewable Energy (Wind & Solar) Photo: Image from internet. Widely used online from multi-countries without credit and seems to be a public domain image. Credit: Unknown Source.

Chart Industries Cryogenic Delivery Truck: Illustration of Cryogenic capabilities required for many industrial gases and for Hydrogen. Credit: Chart Industries.

Zero Emissions Concept Aircraft Photo: Image from Airbus who has promoted "several advanced concept aircraft to explore and mature the design and layout of the world's first climate-neutral, zero-emission commercial aircraft, which we aim to put into service by 2035," said CEO Faury. "The transition to hydrogen, as the primary power source for these concept planes, will require decisive action from the entire aviation ecosystem. Together with the support from government and industrial partners we can rise up to this challenge to scale-up renewable energy and hydrogen for the sustainable future of the aviation industry." Credit: Airbus.

Hydrogen In Water: Image found online globally. Download free from **Pinterest**. Modified by LC for use here based on Hydrogen's expected role in the Energy Transition. Credit: Linton Consulting

Container Ship at Port: Free download for South Carolina Ports Authority. Shipping is an industry giving extensive R&D investment for low emitting technologies. SCPA has been a speaker in our program for two events and is preparing for increased sustainability. Credit: SC Ports Authority.

Steam Turbine: Image provided from Siemens Energy, a partner in LC events for more than 5 years. From website of Siemens Energy Retirees Association ([Photo Gallery - Siemens Westinghouse Retirees Association Inc Orlando, Florida](#)). Image used in multiple other events and activities. Credit: Siemens Energy.

Aerial of Plant Vogtle Nuclear Power Site: Photo from Vogtle / Southern Company / Georgia Power. LC

events have had multiple Tours of this plant over 10 years. Credit: Georgia Power.

Transmission Lines at Sunset: Photo from unidentified online source. Exact source cannot be identified. Credit: Unknown Source.

Forklift at BMW: From newscastus site offering free photo downloads ([BMW Manufacturing Expands Use of Hydrogen Fuel Cells \(newscastus.com\)](https://www.newscastus.com)). BMW was a speaker in 2023 and talked about their use of H2 for forklifts and tugger applications. Credit: Newscastus.

Paccar (Kenworth & Peterbilt) – Toyota Hydrogen Trucks: Paccar a major U.S. truck manufacturer is partnering with Toyota to produce Hydrogen fuel-cell powered trucks. Two models are shown. The image is from a Toyota Press announcement ([PACCAR and Toyota Expand Hydrogen Fuel Cell Truck Collaboration to Include Commercialization - Toyota USA Newsroom](https://www.toyota.com/usa/newsroom)). Credit: Paccar.
